*MDOC

City of Detroit and Wayne County are reported separately.

Note on cumulative counts: This report is provisional and subject to change. As public health investigations of individual cases continue, there will be corrections to the status and details of referred cases that result in changes to this report.

Note on the deaths: Deaths must be reported by health care providers, medical examiners/coroners, and recorded by local health departments in order to be counted.

Note on county classification: For consistency with previous outbreak reporting methodology, the Michigan Department of Corrections (MDOC) has been added as a separate jurisdiction under the "Other" category. This has resulted in the reclassification of some confirmed cases previously indicated among county case counts.

Cumulative Total of Recovered COVID-19 Cases (as of 4/3/2020): 56*

*During this response, MDHHS is reviewing vital records statistics to identify any laboratory confirmed COVID-19 cases who are 30 days out from their onset of illness to represent recovery status. As the pandemic continues to impact Michigan, this pool will expand to include more cases. Recovered is defined as the number of persons with a confirmed COVID-19 diagnosis who are alive 30 days post-onset (or referral date if onset is not available). The number of persons recovered on April 3rd, 2020 represents COVID-19 confirmed individuals with an onset date on or prior to March 4th, 2020. These numbers will be updated every Saturday.
